

Talking Shapes - A Card

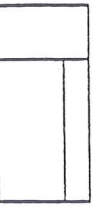

You and your partner have each received a sheet of paper with ten shapes on it. Not all the shapes are the same.

The aim of this activity is for you to decide which shapes are the same without looking at each other's cards.

Describe the shapes which are marked with a * to your partner. Your partner must decide if their pattern is the same as yours. (They can ask questions or for more detail about your shape, but they may not start to describe their own to you.) Write "same" or "different" beside each one.

Finally compare your card with your partner's to see if you were both correct.
